# WHO WE ARE

Ultracycle bicycle parts and accessories represent the best value, quality, and selection for every type of bike and rider.

By listening to our shops and sales reps, we select the items that will provide the best value for both the customer and the retailer.

Partnering directly with established factories, we achieve consistent quality across our product lines.

Attention is given to packaging and presentation, as we know that products often have to sell themselves in a busy shop environment.

Clear selling points, consistent color themes, and clear instructions are a priority on our Ultracycle packaging.

## KHS Minimum Advertised Price, Online Sales, and Intellectual Property Policy (USA)

Initial Effective date: October 1, 2021

KHS, Inc. (KHS) is responsible for the marketing and sales of its branded products (KHS, Free Agent, Manhattan, UltraCycle and Q2; referred to as "KHS Branded Products"). To ensure the integrity, retain the value, build and maintain the retail network, sell and service its KHS branded products, KHS has unilaterally adopted the following Minimum Advertised Price (MAP), Online Sales, and Intellectual Property policies for all retailers in the USA.

### Minimum Advertised Price

KHS branded products must be advertised at prices no less than the MAP. Please note MAP and Manufacturer Suggested Retail Price (MSRP) may be the same price. Current pricing information is available by logging on to [www.khsdealers.com](http://www.khsdealers.com) or in excel by written request to [map@khsbicycles.com](mailto:map@khsbicycles.com). The most current version of this policy is available at <https://www.khsdealers.com/download.aspx>

The MAP Policy applies to all advertised prices for KHS branded products. KHS branded products will be exempted from all store-wide or category-wide sales or coupons which would effectively advertise them below MAP. Bundling of multiple KHS branded products are permitted if the bundled price is at or above the combined total of the branded products'

individual MAPs. If pricing is displayed for KHS branded products, any strike-through or other alteration of the MAP price is prohibited. Further, KHS may not be advertised using "make an offer" or "price matching" sales strategies.
